**Emergency Readiness Wheel Re-order**

Date:

As a benefit to its active members in good standing and made available to all Medicare-certified home health agencies operating in Pennsylvania, the Pennsylvania Homecare Association has negotiated a favored rate for reorder by its members of the Emergency Readiness Wheels (senior version). Reorder beyond the supply provided to each member agency by PHA will be the responsibility of the specific agency to cover cost and shipping. The reorder will be the same wheels (green) purchased by PHA but with a blank space in the logo area where it is encouraged that each agency print labels to adhere in the area before distributing the wheels as a service to your clients. The wheels will be priced at **\$3.10 each** with a minimum order of 200 wheels. Wheels are boxed in quantities of 200 and bundled within each box in plastic bags of 25 for easy distribution and inventory control. This price will be honored for one year and expire 8/15/08 and subject to membership verification. The wheels will be delivered as soon after a completed order and payment is arranged with the distributor (usually within 3 weeks). Supply will be subject to availability by the printer. To place a re-order, simply complete this single page form and fax directly to the number listed above. Should there be any questions or need for clarification, the distributor will contact you directly.
